GrandExpertS

Training older experts to share their knowledge
and create their own learning material

GrandExpertS is an international, interdisciplinary and collaborative project funded by the European Commission under the Erasmus+ programme.

The project intends to empower older adults with specific knowledge and experience to develop digital learning content by themselves.

In order to best prepare them for their activities as an e-author, they will be trained and accompanied by multimedia experts and trainers in adult education.

At the end of the project, all developed learning material shall be published on a freely accessible platform and shared with interested seniors across Europe.

As digital competencies contribute to skills that enhance individual empowerment and participation in society, the project contributes to active ageing in later life.

Online Training Course

- for volunteers who would like to create and deliver content about their field of expertise
- multimedia enriched with videos, interactive exercises and more
- course covers topics inter alia writing techniques, learning with digital devices and multimedia production

Learning Management System

- specifically adapted to the needs and requirements of older learners
- capable for stationary and mobile use

Set of E-learning Modules

- topics concern the everyday life of older adults across Europe
- tested by older adults
- freely available in various languages
